Forecast for 1963

By ROGER BABSON (Cont. from last week.)

CUBAN OUTLOOK

I forecast that the Cuban problem will not be settled in 1963. It may extend until after the 1964 presidential elections. The Russians have removed their missile installations and bombers from Cuba, in accordance with President Kennedy's demands. In return, Mr. Khrushchev will undoubtedly want some concession in Berlin, or in Turkey-which now bottles up Russia in the winter due to Turkey's conerol of the Dardanelles.

Khrushchev must placate his people at home by improving

ard of living. I saw this very clearly when I was in Moscow. He helped Castro only so that he would have something to trade with the United States, either in connection with Berlin or with our bases which we now have in Europe. Khrushchev expected to later withdraw from Cuba when he first decided to help Castro. He knew Russia could continue to use Cuba as a base for Russian submarines. Now both Khrushchev and Castro are look-

rather than reducing their stand-

ing to save face at home. Some think the Cuban fracas will make President Kennedy much tougher with labor here in the United States, but I disagree, Labor leaders may be more reasonable in their demands, but they will continue to have friends at the White House.

LABOR. PROFIT MARGN

Readers should realize that the steel workers can reopen their wage contract after May 1, 1963. The settlement of this contract will be very likely to influence other labor disputes, depending largely on international conditions

in 1963 that wages finally depend upon the employer's margin of profit. The year 1962 has seen many employers close down because of their slight margin. Small businessmen-both manufacturers and retailersmust have a larger margin of profit in order to exist. There are too many mergers into bigger units and too many failures of worthy employers. Labor leaders are largely responsible for this unfortunate development and are slowly pricing themselves out of business. Sooner or later this can result in much unemployment. Why work?

In a Dec. 27 release the Mississippi Society Daughters of the American Revolution tells of a state approved textbook, The New Our New Friends, for first year readers wherein the classic story of the ant and the grasshopper has been distort-

In the version with which most of us are familiar the ant labored against the bad times of cold weather while the grasshopper played with the result that when the anticipated cold weather came the ant had food while the grasshopper did not. In this newer version the animal characters are changed to squirels with one of them playing instead of storing nuts for winter use as did the others. The moral is not only changed also, it is reversed, ending up with the improvident and nonworking squirrel finding out that all he has to do to get food in hard times is to "ask for it".

The DAR quite properly objects to this subtle propaganda for the welfare state and queries who is responsible for this poisoning of the young mind, the author, the school authorites or the parents and other taxpayers who tolerate it?

With the organization's concern we are certainly sympathetic but find a more alarming illustration of the same thing right here in Hancock County. During relatively prosperous 1962 almost 25 percent of our population received relief in one form or another, sometimes calling for it in a new car.

Oracles and omens

Since even before the days of the Oracle of Delphi peoples of this world have looked to extraneous portents, from the entrails of chickens up and down, to forecast the future, we wondered if the bowl games might provide some glimpse of the future for us.

To recapitulate what most of you already know: in the Orange Bowl it was Alabama 17, Oklahoma 0; the Sugar Bowl found Ole Miss on top 17-13 over Arkansas of the Southwest; while Louisiana State passed over Texas 13 to 0. In addition. on Saturday it was Florida in a 17-7 romp over the Pride of the

To some this might augur that the South Shall Rise Again, but being of a more practical turn of mind all we can see in these omens is that neither the Kennedy Duo nor the federal judiciary officiated at those games.

And in 63

With the advent of 1963 there is the chance to start a new year afresh, but that doesn't obliterate our failures of onission or commission of previous years. It merely points up the need to get going on things we ought already to have done.

Without going into our own many errors, we'd like to mention a few easy things we think the city should have accomplished in 1962 (or before).

Cue and Gex Streets still need to be made one way in onposite directions.

Even NASA authorities have urged this. A los of streets, Union comes to mind, should have parking

permitted on one side only. And enforced.

And what happened to the plans for a sidewalk on Dunbar from U. S. 90 to North Bay Elementary?

Et cetera, et cetera, et cetera.

This being an election year for county and state offices, we refuse to join the politicos and make vain promises for

Improvements in canning freezing, and storage have been greatly advanced, while the big supermarkets have been beneficial in stabilizing prices. The hope of the fruit growers rests in cooperative advertisements in newspapers and other media.

Certain basic chemicals will surely decline in price due to over-production and competition from imports. The U.S. Justice Department claims to be working for consumers in its fights with many companies such as the dairy concerns, but in the end supply and demand will determine the result and not legislation or court decisions.

TAXES, INFLATION

Before the Kennedy Administration retires, I forecast that we will have either more taxes or more inflation. Neither, however, need come in 1963. The stock market may discount the expected inflation by temporarily continuing above 600 on the Dow-Jones Industrial Average. The November elections indicate that the voters want a "welfare state" and I believe this means more inflation rather than more taxes.

The old saying, "We cannot have our cake and eat it too," is certainly true today. The elections referred to above indicate that the majority of voters really believe they can have all these temporal benefits such as medical care for the aged, medical and hospital payments, more social security, etc., without having to pay the bill either through increased taxes or through inflation. With all that is promised to

young people in the form of free education, college scholarships, etc., in addition to the abovementioned help, this means that the employed people, from ages 25 to 65, must carry the entire burden. Sometime they will rebel, but it will not be in 1963 although it might come at the next presidential election. Certainly the enactment of a "real" all-inclusive tax cut is no sure thing. It may look good to the "working man" but not to investors or

dollar or temporarily look prosperous by phony bookkeeping, the other nations will gradually follow suit and we will all wind up where we started.

The dollar will not be devalued in 1963, although the Wall Street and Lombard Street brokers will put out propaganda to the contrary.

Now, a final word with regard to gold. The United States will continue to lose gold on halance during 1963. The only way to prevent it in 1963 is for us to export more goods and import less. This would require certain sacrifice on the part of our people.

Since my trip to Africa, I have concluded that the answer is in producing more gold rather than leaving it underground, if gold had a free market, its proly and it would then represent one of the safest and most profitable investments available today. Another one may be uranium

Of course, large quantities of gold may be found on the surface of the moon-which brings me to my final subject, which I hope readers will take seriously.

COING TO THE MOON

Nobody will reach the moon in 1963 or in 1964, but you will see more and more about it in the newspapers during 1964-or 1965. Do not think that the United States will be the only country preparing for this trip. Russia, England, France, Germany, and possibly China are preparing today to go to the moon. With labor getting 15 cents for a 12-hour day in China and with booster engines purchasable abroad, China may be the first to get to the moon. China does not need to be a member of the United Nations in order to send a rocket and three men to the moon and return. China's trip to the moon may be financed by foreign capital. China will win the territory it wants in India and ultimately get Burma.

Buying of "going to the moon" stocks may become a very active speculation. The original boosters will be paid for by some government, but their operation will be left for profit. The situation may compare with our great 'gold rush' in 1849, However, it will not be limited to gold, but will also include diamonds, platinum, and perhaps other elements which are not yet in our chemistry books. My greatgrandparents were all seafaring men taking people from New England down the East Coast of South America around the Horn and up the Pacific Coast - a trip to two months. The astronauts say that they can make the trip to the moon easily in less than four days. One final thought if the Kennedy Administration gets into too much of a jam between taxes and inflation, the promotion of trips to the moon may pull them out of their troubles. By enticing private capital which is now in need of some attractive speculative investments, this might even bring about another big stock market boom in the late Sixties.

as midnight approached .but Kenny Fayard made up for his negligence by sounding the Waveland siren for a record breaking stint. We weren't present, but Kenny gets credit for the sound as no one else will confess! This was mild in comparison to the din created by multiple fireworks exploded all over town. . . and we're quite certain that horns, whistles and Auld Lang Syne obliterated such sounds for those attending dances at the American Legion Home, Yacht Club, K. C. Hall and Clermont-Lakeshore Youth Center-anyway 1963 was ushered in in a truly galafashion -as the witching hour approached we were quietly reading a fairly dull book and envying revelers until our bright eyed and bushy tailed awakening to a really beautiful hangover-less morning more than made up for the fact that for once we are ready to admit that it's time to throw in the sponge when it comes to going to bed as the sun rises.
